

# Ranking projects in the Coordination Plan

Alternatives for making ranking decisions:

- A. Project addresses area of greatest need
  - Most “hits” on a customer survey
  - Most “hits” on a provider/agency survey
  - Geographic area where there are few or no providers
  - Geographic area where the greatest number of people need a particular service
- B. Project is most cost effective
  - Serves the most people for the least money
  - The expected benefits are the greatest for the amount of money expended
  - The most use is made of existing resources to deliver a new service
  - The project will reduce costs in the long run
- C. Project demonstrates the greatest amount of coordination among partners
  - Most partners are involved
  - Leverages the most funds from partnerships
  - Service to clients is most coordinated/integrated
  - Administration is the most coordinated/integrated
